

## GASTRIC CANCER

Normal epithelia

Chronic gastritis

Atrophic gastritis

Intestinal metaplasia

Dysplasia

Adenocarcinoma

Normal gastric mucosa

Diffuse-type adenocarcinoma

*H. pylori* → Epithelial cell signaling in Helicobacter pylori infection

Genetic alterations

Oncogenes : TERT, ERBB2, K-Ras, N-Ras, Cyclin E, c-Met, FGFR2  
Tumor suppressors : p53, APC, CDH1
